## 3-way calling script

[The expert must always relate to initiate a 3-way call...ask them what they do for living]

\_\_\_\_\_, how much do you know about what we are doing?

OK, well let me ask you \_\_\_\_\_

- 1) Do you have or pay essential bills like cell phone, internet and television bills?
- 2) Have any of your current providers ever sent you a monthly check for using or referring their services? {Pause}

OK, Well that is exactly what we do

I'm in charge of bringing a concept called digital video phone technology to North America through a 17 year old company that operates in 20 different countries.

\_\_\_\_\_, Have you seen a VideoPhone yet?

Well, it's the coolest thing since the iPhone and we control the patents on the technology. As you probably know, telecommunications is a \$1.24 trillion dollar industry and it's going through a HUGE digital revolution as we speak.

We are the world's largest seller of this revolutionary device and we've put together a marketing strategy on how to capture a significant percentage of the growth in your local area.

\_\_\_\_\_, You know that computers, cell phones and the internet made average people rich, right?

Of course....and our strategy is to use simple word of mouth to capture 100,000 customers in your surrounding area over the next 3 years. The company has agreed to a 37% revenue split meaning we can get some portion of \$1.1 million in monthly commissions every single month on that product alone.

And since we offer 6 other essential products as well including cellular, internet and television, this income potential could increase 3 or 4 fold.

\_\_\_\_\_, You probably know that passive or residual income is the key to wealth, right?

We are talking about a true contracted residual income simply for making some key referrals to customers and other entrepreneurs like yourself.

That is all I can share for now, but based upon what I said would it be worth it to set a time to see the product and review the compensation? I can make time \_\_\_\_\_
